Museum De Valk

De Valk is a tower mill and museum in Leiden, Netherlands.

The current tower mill is the third mill built at this location. In 1611 the post mill "De Valck" was built, and in 1667 it was replaced by a wooden post mill. In 1743 a higher tower mill was built. De Valk originally was equipped with six mill stones. There were two dwellings in the mill, originally for the two owners, later for the miller and his assistant.

In June 1966 the mill became a municipal museum. In 2000, the De Valk mill became operationally functional again and has been used for milling.
